

WIDMER TIME RECORDER CO., INC.

**DOCUMENT
CERTIFICATION
EQUIPMENT
FROM
WIDMER**

The Need

University and Municipality Registrars, Health Officers and other government officials must provide “Original Documents” which are difficult-to-nearly impossible to alter or forge. Often large quantities must be processed quickly. Manual embossing and signing thousands of documents each year is unproductive and fatiguing.

Be confident and secure that all documents are original & certified. The RS-PTV will sign and print seal in one pass through this high-speed, cut-sheet imprinter at a rate of **120 per minute**. Dual security locks and removable die plates are standard for added security and fraud protection.

The Solution

Widmer RS-PTV Document Certifier

The Model RS-PTV Document Certifier prints the agency’s official seal onto the document in single or tri-color indelible ink. The Official’s signature, title and additional appropriate text is also imprinted in single or tri-color indelible ink. This process insures the highest degree of “fidelity of reproduction”.

Additional Benefits include batch & non-resettable counter, the ability to process small forms as well as large legal & European size papers and nine programmable presets to reduce operator input and set-up time.

Built-in Dependability / Ruggedness – including steel hardened shafts, self-lubricating bearings, high torque stepper motors, and much more. Designed for reliability and ease of operation.

In addition to the RS-PTV Document Certifier, Widmer offers other certifying equipment solutions.....

More Document Certifying Solutions!!!

E-3 Embosser

Model E-3 Electric Embosser The E-3 manual feed embosser creates a raised seal onto the document. Single hand operation, no buttons to push, or levers to pull. Stamping pressure can be easily electronically adjusted for different paper thickness. Options include security lock, guide shelf, visual counter and others.

TV 776 Imprinter

Model TV-776 Electric Imprinter Will print the Agency seal, Official's signature, title and other appropriate text in tri-color or single color ink. Two printing heads enable numerous combinations of seal, signature, text, date and number. Options include security lock, guide shelf, LED time display, visual counter and others.

E-3 Embosser

D-3 Date / Signature Stamp

The Two-step Emboss & Imprint Combines the E-3 Embosser and D-3 Date / Signature stamp. Documents can be processed with the Agency seal embossed and the official's signature and title and date (and/or numbered) imprinted in indelible ink..
